Customer Reviews

Just completed this booklet in a week and WOW that was fun. Being a map nerd it's hard to NOT like doing this book, but this was especially fun due to all of the supplementary things involved.1. On almost every page there are extensive explanations for WHY you are doing the things the book wants you to.2. Almost every page asks a simple question that requires you to dig a little deeper.3. At the beginning of every chapter is a cool excerpt of how this individual chapter was done in its original context. This was great because it makes you feel like you are "solving" a major issue.Just an overall great book; long enough to cover the majority of intro-level material, but short enough that you can do it in a week like me!

It is a brand new book, perfect seller, perfect price.
